ABOUT ME

Full Stack Developer with a passion for exploring emerging technologies, with over three years of hands-on experience in crafting responsive, user-focused websites and scalable web applications. I specialize in designing and optimizing user interfaces to enhance usability and user experience.

PROFESSIONAL EXPERIENCE

Software Developer

Residency CAES- Hermosillo, Mexico
February 2024— June 2025

- Built and deploy application for semi-automated invoice capturing using Python.
- Implemented PyTesseract library for Optical Character Recognition of invoices.
- Designed regex-based search functionalities to streamline text processing tasks significantly reducing manual labor by 80%
- Customized application for different types of invoices from CAES.

Full-Stack Developer Ruby

Freelancer – Hermosillo, Mexico
2021 – 2024

- Developed a comprehensive time management webpage using JavaScript, CSS and HTML.
- Designed intuitive user interfaces with HTML and CSS, and visually appealing layout across various devices.
- Implemented dynamic functionality with vanilla JavaScript to manage tasks and reminders to enhance productivity.
- Developed a dynamic and user-friendly blog using WordPress.
- Designed and implemented RESTful APIs to facilitate seamless communication between the front-end and the back-end systems.

Back-End Developer

Congreso HELA – Hermosillo, Mexico
2020 – 2022

- Built a user-authenticated task manager with CRUD functionality using Django.
- Led the complete redesign and migration of the official website, improving performance and user engagement through the use of HTML, CSS, and JavaScript.
- Integrated WooCommerce and MercadoPago to enable the sale of membership cards, ensuring a smooth transaction process for users.
- Managed hosting, domain configurations, and database migrations, ensuring site reliability and uptime.

EDUCATION

Biomedical Engineer, Specialization in Technological Applications

Instituto Tecnológico de Hermosillo

2018 – 2024

- Specialized in developing software to create innovative solutions, with experience in optimizing tasks with the use of software for various applications, including web-based platforms and digital systems.
